PERSONAL PROJECTS

Foodora Virtual Reality Experience 2017

Mobile VR Application to experience selected premium restaurants in I/K.

- I was part of a team for this weekend hackathon project at Foodora. The VR Application communicated with the Foodora REST Api to display Menus, pictures and restaurants in a 360 VR experience.

- I worked on the REST API integration, apply all the scenes previously defined such as (3d scene, 360 photos for restaurants, and place user inside a 360 video of a chef cooking) and any other VR UI elements in Unity3d.

Deutsche Bank API Open Hackathon 2016 <https://api-open.db.com/>

Secure Mobile payment and Identity verification Application using the Deutsche Bank API

- I was part of a team that developed a secure and fast mobile payment application that could also act as an identity verification provider using the Deutsche Bank Api.

- I was responsible for the mobile app that would scan codes and communicate with apis.

Rocket Internet Hackathon 2016

3rd Place, 1/K Remote Product Presentation Application

- My team developed a MVP for a VR application including a browser based remote administration tool to showcase architectural products to customers.

- I was working on the VR UI Scene, Scripts, and controls
